

LOW SLOPE/VENTILATED ROOF EAVE DETAIL

MC-10C

See table 1a and 1b for underlayment requirements

HIGH PROFILE TILE WITH BIRD STOP

**NOTES:**

1. For recommended underlayment and fastening, see page 13, Table 1A, 1B & 1C.
2. An eave drip edge flashing is required at all downslope perimeter edges.
3. Eave closure shall be of a height equal to combined thickness of batten system and thickness of one course of tile.
4. Dimensions shown are minimums and are intended to be approximate to all for reasonable tolerances due to field conditions.
5. For extended eave, optional separator ply or sheet of No. 15 asphalt saturated felt or appropriate material.

Drawing shown depicts the application of all tile profiles. Unless otherwise noted, it would apply to either concrete or clay tiles.
