

VERTICAL BATTENS - FOR STANDARD VALLEY AND HIPS

MC-06A

Notes:

1. For recommended underlayment and fastening requirement, see Table 1A and 1B.
2. Horizontal battens shall not be less than nominal 1"x2" or code approved equal.
3. Consideration should be given to climate and roof orientation to determine if it is beneficial to specify/use vertical battens over underlayment, with horizontal battens secured over the vertical battens.
4. See Table 2 and Table 3 for additional considerations.

Drawing shown depicts the application of all tile profiles. Unless otherwise noted it would apply to either concrete or clay tiles.
