METAL PAN FLASHING WITH Drip Edge

TYPICAL RANGE

Notes:
1. Flashing details may vary according to local weather conditions, roof size, location, slope of roof and contributary run-off area.
2. Underlayment will extend a minimum of 4" up vertical wood blocking, wall, or to the top of fascia or gable trim.
3. Sheet metal flashing should be a minimum of (No. 28 galvanized sheet gauge) not less than 0.019 inch corrosion-resistant metal (G90). See Table A for additional options.
4. Dimensions shown are minimums and are intended to be approximate to allow for reasonable tolerances due to field conditions, and area practices.
5. Rake flashing and wood nailing/trim board will be raised above the roof deck to a height greater than the height of the installed roof tile.

Drawing shown depicts the application of all tile profiles. Unless otherwise noted it would apply to either concrete or clay tiles.
