

SPECIALTY CONDITIONS - PRE-ENGINEERED ROOF

MC-25C

Installation on Metal Deck - Optional Considerations
Adhesive Based Systems - Solid Sheathing

Note: Adhesion of underlayment to substrate shall be in accordance with assemblies recognized in a current ICC-ES evaluation report for roof tile adhesives evaluated to the requirements of AC-152.

The pre-engineered roof system are included for informational purposes only and are not recognized under evaluation reports for roof tiles.

Notes:

1. On Type I (Non-Combustible) building all components must be fire-resistant as approved by local building officials.
2. Dimensions shown are recommended minimums and are intended to be approximate to allow for reasonable tolerances due to field conditions.

Drawing shown depicts the application of all tile profiles. Unless otherwise noted it would apply to either concrete or clay tiles.
