Eagle is proud to be affiliated with these organizations:

Tile Roofs Rise Above With Value, Durability And Beauty.

Eagle concrete tile roofs are as beautiful as they are durable. The available styles and colors help enhance any architecture, resulting in curb appeal that is simply not available with other roofing materials. Whether your interest is durability, color selection or energy efficiency, Eagle has a tile roof to suit your needs.

Affordability

A tile roof is one of the best ways to protect and beautify your home and is one of the longest-lasting roofing products you can buy. Unlike some other roofing materials, concrete tile is engineered to last for the life of the structure, giving it one of the lowest lifecycle costs of any roofing material. It's important to take this lifecycle cost into consideration, as the cost of a tile roof is quite affordable when compared to other materials.

Protection From The Elements

Tile has been around for centuries in some of the world's most inclement climates. And all of Eagle's roofing products have been thoroughly tested to provide superior performance and reliability. So your properly installed Eagle tile roof can withstand rain, snow, high wind and scorching heat, and provide years of worry-free performance.

- All Eagle roof tile is a Class A fire roof covering.
- Eagle roof tile meets current seismic load requirements.
- All Eagle standard weight color thru tile passes Freeze-Thaw requirements.*

Reduced Insurance Costs

If you live in a region prone to fire, an Eagle tile roof may even provide a reduction in your insurance premiums. Check with your local insurance company for more details.

Industry Best Warranty

Your Eagle tile roof warranty** protects residential and commercial structures; offering a transferable option when it comes time to sell. And Home Owner Associations qualify for our HOA, 50-year warranty.

*Slurry/Color-Bonded tiles are not recommended in areas that are subject to repeated freeze-thaw cycles. These are noted in the brochure with an asterisk next to the name.

**Warranty must be properly registered; and can be transferred one time. Warranty information is available on our website.

Green From The Inside Out

Tile is an inherently green product, made from locally sourced materials and manufactured with the most advanced equipment and processes available.

- Eagle tile is composed of pre-consumer recycled content and environmentally friendly materials.
- Tile can be crushed and reintroduced into the manufacturing process, or reused for other applications – reducing the impact on landfills.
- Eagle roof tile can help to lower energy costs by reducing heat transfer through air circulation under the tile and because of concrete's inherent insulating properties.
- Eagle tile is Cool Roof Rated and compliant to codes and green building requirements. They will also provide increased energy performance for your home.***

Unmatched Beauty And Curb Appeal

Our products emulate historic roofing materials such as wood shake, clay and slate—but are much more affordable alternatives. Eagle offers a wide array of colors and styles designed to enhance any architectural style. Not only does your home benefit from improved energy efficiency and durability, it will enhance your curb appeal and resale value.

Discover Eagle. Discover American Made Quality.

We invite you to explore the styles and colors of Eagle products in this brochure, and we hope you will make Eagle your company of choice. We will do everything in our power to ensure that you become another satisfied Eagle customer.

***Actual savings will vary based on geographic location, installation methods and building characteristics.

An Eagle Tile Roof. The Choice Is Easy.

Eagle Profiles

Choose From A Variety Of Profiles Designed To Complement Any Architectural Style

Eagle Colors

Eagle Star Price Category Reference

Throughout the product sections, you will see our star rating designations with each product. This has been developed to assist in your budgeting process. A single star denotes the most economical color choice, while three stars represents our richest blends and color schemes.

★ **Price Category 1**

★★ **Price Category 2**

★★★ **Price Category 3**

Choose An Eagle Concrete Tile Roof

We are confident you will find a tile roof to be your ideal choice for durability, energy-efficiency and beauty. Here are a few considerations to keep in mind when planning for your new tile roof:

Color & style choice – We recommend you make your final color selections from a current, full size tile sample, as colors can appear different in printed materials and online.

How to obtain a tile sample – You can visit our website or contact your local Design Center or Eagle Sales Representative. See this brochure or our website for locations near you.

See the product installed – Your local Design Center or Eagle Sales Representative is glad to provide you with local addresses to view installations of your profile/color choices.

*Slurry/Color-Bonded tiles are not recommended in areas that are subject to repeated freeze-thaw cycles. These are noted in the brochure with an asterisk next to the name. If you select a colorful or blended tile, make sure your installer blends your roof properly to avoid concentrations of color (called hot spots or checkboarding).

Is Your Roof Cool?

Cool Roof Rated products are listed with the Cool Roof Rating Council (www.coolroofs.org) and have been tested and approved as highly reflective. Eagle offers many different colors and profiles of Cool Roofing options, which can help reduce your energy costs by 10-30 percent. They also have environmental benefits as well, by reducing global warming and urban heat island effects, smog and the production of CO₂.

Here's How It Works:

A cool roof reflects and emits the sun's energy as light back to the sky, rather than transferring it to the building below it as heat. Therefore, a tile's "coolness" is measured by two properties:

Solar Reflectance – Fraction of sun energy reflected by roof (0-100%).

Thermal Emittance – Ability of roof surface to release (emit) absorbed heat (0-100%).

The recognition of the benefits are becoming more widespread and have been adopted by building codes and green building programs across the nation. You will see the following referenced for each of our Cool Roof colors throughout our brochure:

Cool Roof Rating Council, Energy Star and LEED

These ratings establish guidelines to measure and qualify roofing materials to industry green and energy standards and programs. The ratings are found under the product panel shots.

Ref = Reflectance – Fraction of sun energy reflected by roof (0-100%).

Emi = Emittance – Ability of roof surface to release (emit) absorbed heat (0-100%).

SRI = Solar Reflectance Index – Measure incorporating reflectance & emittance into a single value.

A-Ref = Aged Reflectance – Three year calculated (CEC) value.

A-Emi = Aged Emittance – Three year tested, at approved test lab.

A-SRI = Aged Solar Reflectance Index – Measure incorporating aged reflectance & emittance into a single value.

CRRC # = Product listing ID – Cool Roof Rating Council Product Identification number.

“According to the EPA, about \$40 billion is spent annually in the US to air condition buildings – one-sixth of all electricity generated in a year! ENERGY STAR qualified roof products reduce the amount of air conditioning needed in buildings and can reduce energy bills by up to 50%.”

Source: www.energystar.gov

Introducing Artisan Series

Inspired by the roofs found in the Old World, our new Artisan Series Collection is unlike anything else available today. These unique concrete tiles are created from a single base color, which then are treated with a special process that creates random streaks in beautiful accent colors so that no two tiles look the same. The result is a rustic and distinctive appearance, in a durable concrete tile that will dramatically enhance any style of roof.

Give Your Roof A Boost.

It's easy to achieve the beauty of an authentic mortar-boosed clay roof with our Boosted Cap tiles. These individual Boosted Cap pieces are available in all of our colors, including our new Artisan Series. Simply select a Boosted Cap color to complement your Capistrano tile. To customize your look, contact your Eagle Representative or Design Center for help combining colors.

Choose a Boosted Cap accessory piece to go with your base Capistrano field tile. Then decide how much "Boost" to use and how you would like your mortar to look. Some prefer a neat treatment, while others like an authentic look. No matter your choice, your new Boosted Eagle roof will be beautiful for years to come.

| % used on roof | Aprox. installed weight field tile per 100 sq ft |
|------------------------|---|
| 10% Application | 968 |
| 20% Application | 1056 |
| 30% Application | 1144 |

Each Boosted Capistrano cap weighs approx 4.8 lbs.

Ponderosa – Staggered Installation Method
5502 Arcadia

Higher Performance. Improved Installations.

Your roof can do more than just beautify the structure it protects. When you use these simple Eagle Roofing Accessories, you will increase the performance, longevity and efficiency of your new roof.

3 Ridge & Hip

2 Deck

1 Eave

Capistrano - Artisan Series Tile
39706 Grand Canyon

Ask about our new underlayment:

2 **EagleSeal™**
Roof Tile Underlayment

Our new premium, multi-purpose self-adhering roofing and waterproofing underlayment is the ideal start to your new tile roof. EagleSeal™ provides a nearly impermeable seal between your tile and deck. It safeguards against unwanted water intrusion and aids in insulating your home in harsh weather conditions. No heating necessary to apply, simply peel back the adhesive backing and lay it down.

Eagle Roofing Products. Your Company Of Choice.

When you choose Eagle, you're choosing American-made quality, customer-centric service, and innovative products that advance the roofing products industry while treading lightly on the planet.

Eagle Roofing Products is a Division of Burlingame Industries, a family-owned, privately held company based in California. In addition to our original roof tile manufacturing facility in Rialto, California—the world's largest—we operate facilities in Phoenix, Arizona; Stockton, California; and Sumterville, Florida; to serve local customers with experienced local teams. These sophisticated, high volume manufacturing plants ensure timely availability of high quality products, and they help us remain knowledgeable of regional trends and needs.

Eagle Green

We take our commitment to being environmentally friendly seriously, which is evident in our Eagle Green initiative. We lead all other concrete tile manufacturers with our recycling and re-use activities:

- We make a concerted effort to reduce haul-off from all of our plants when purchasing the most energy-efficient and environmentally safe equipment we can find.
- Rejected tile is crushed and re-introduced into the manufacturing process.
- Trash that cannot be recycled is compacted to reduce landfill deposits.
- Wood tile pallets are repaired and re-used whenever possible.
- Synthetic oils are used on machinery when possible due to their long life-span.
- Engine oil and filters from plant equipment are recycled.
- All Eagle tile sealers are water-based.

The Eagle Way

We have grown over the years due to a philosophy that revolves around growing personal relationships. This starts with our people, and it is reflected in our relationships with our customers and our business partners. Having earned a reputation as the company of choice, we listen to our customers and react quickly to satisfy their needs. All Eagle employees are customer service representatives regardless of their job titles. From our people in the field, to our Order and Shipping departments, all the way to our Tile-Makers, each person performs with the singular goal of customer satisfaction.

Eagle's long experience in the roofing tile industry and dedication to prompt personal response to our customers' needs have resulted in a well-deserved reputation for quality and service throughout the construction community.

At Eagle, Innovation Comes In Many Choices

Our product development teams never stop thinking about—or creating—what's next in roofing products. All of our products are designed to deliver exceptional value, performance and aesthetics.

Our Cool Roof systems are setting the standard for energy efficiency. And our Solar Roof leads the way in unmatched beauty and effectiveness.

Another recent example of Eagle's innovation is our Artisan Series. This concrete tile is made with a special process that creates random streaks in beautiful accent colors so that no two tiles look the same. The result is a rustic and distinctive clay tile appearance that will dramatically enhance any style of roof.

Of course, we also offer the latest in concrete tile, in a myriad of colors from which to choose. As the foundation of our product offering, our concrete tile is renowned for its durability and beauty.

Eagle is proud to be owned, operated and manufactured in the USA.

Helpful Tips

A tile roof is one of the best ways to protect and beautify your home or building, and has one of the lowest lifecycle costs of any roofing material.

- Choose a reliable and qualified tile roofing contractor who will ensure your new tile roof is installed properly.
- Our Slurry/Color-Bonded* tiles are not recommended in areas that are subject to repeated freeze-thaw cycles. Each of these colors is noted throughout the brochure for your convenience.
- If you choose one of our blends or colorful tiles, make sure your installer blends your roof properly to avoid concentrations of color (often referred to as checker boarding or hot spots).

To ensure your new tile roof is installed properly, Eagle can provide you with qualified roofing contractors in your area. Please contact us through our website or at any of our Design Centers.

Bel Air
4602 Concord Blend

DISCLAIMER—All colors subject to change without notice. Actual tile colors may vary from presentation in online and printed materials. Slight variations in color or flashing may occur during manufacturing. Before making a final selection, be sure to obtain current tile samples and view current roof installations.

APPROVALS – ICC-ES ESR CC-ES ESR 1900. Florida Building Code FL 7473 (Approved for use outside HVHZ). Florida Building Code FL 8835 (Approved for use in and outside HVHZ). 06-0526.08 Miami-Dade County, Florida / exp. 2016 (Capistrano Tile). 06-0526.09 Miami-Dade County, Florida / exp. 2016 (Malibu Tile). 06-0526.10 Miami-Dade County, Florida / exp. 2016 (Flat Profile Tiles). 11-1-11.05 Miami-Dade County, Florida / exp. 2013 (EagleSeal™).

FIRE RESISTANCE – Both standard weight EAGLE and Eaglelite® tile installed over solid sheathing are used as Class A Roof Coverings: IBC-1505.2 & IRC R902.1. EAGLE tiles easily exceed the resistance requirements for burning brands and spread of flame listed in A.S.T.M. Class A fire test criteria.

COLD WEATHER RESISTANCE – EAGLE tile products surpass the freeze-thaw test requirements of all known building code development agencies. Color-bonded/slurry coated tiles are not recommended in regions subject to repeated freeze-thaw cycles.

INSTALLATION – EAGLE's installation recommendation ICC-ES ESR 1900 and the Tile Roof Institute's Moderate Climate Region guides are available on our website, eagleroofing.com, or visit: tileroofing.org or icc-es.org.

WARRANTY – Limited lifetime product warranty available. Note: EAGLE warrants the performance of tiles only. Workmanship and accessory materials must be warranted by others.

EFFLORESCENCE – Temporary light patterning may appear on darker tiles. This is caused by efflorescence and occurs naturally as seen on sidewalks, and brick walls when alkaline deposits gravitate to surfaces exposed to moisture. The surface of every EAGLE tile has been treated to minimize efflorescence.

Eagle Design Centers

Eagle understands a beautiful roof is one of the most important architectural elements of your home or building. Our regional locations are staffed with knowledgeable professionals to support you each step of the way.

Visit Your Local Eagle Design Center:

- Available styles and colors on display.
- Tile samples can be picked-up or shipped at no cost.
- Installed roof photos and jobsite addresses.
- Brochures and architectural tools.
- Color and design consultation by trained professionals.
- Exterior samples such as paint and manufactured stone to complement your tile roof.
