for the Reroof Market

EAGLELITE®
Lightweight, Firesafe Roof Tile

*Bel Air Staggered
297 Slate Range*

USA Owned. USA Made.

Creating a Greener Environment

Understanding How It Affects You

Eagle Roofing Products is committed to adhering to the California Energy Commission's energy standards by providing our Customers with Cool Roof concrete tile solutions that not only meet the new requirements, but deliver the beauty, durability and value that you've come to expect.

What is California's Standards?

California's Title 24 energy standards address the energy efficiency of new construction of, and additions and alterations to, homes and commercial buildings. Since buildings are one of the major contributors to electricity demand, the goal of Title 24 is to reduce energy consumption in California for its energy future.

The Title 24 Roofing Code establishes new requirements to promote the installation of "Cool Roofs" in Low Rise Residential Steep Slope Construction. Cool Roofs are roofs consisting of materials that reflect the sun's energy from the roof surface, as well as have high emissivity, allowing them to emit infrared energy. Thus, significantly reducing energy costs and urban heat islands.

How Does Title 24 Impact You?

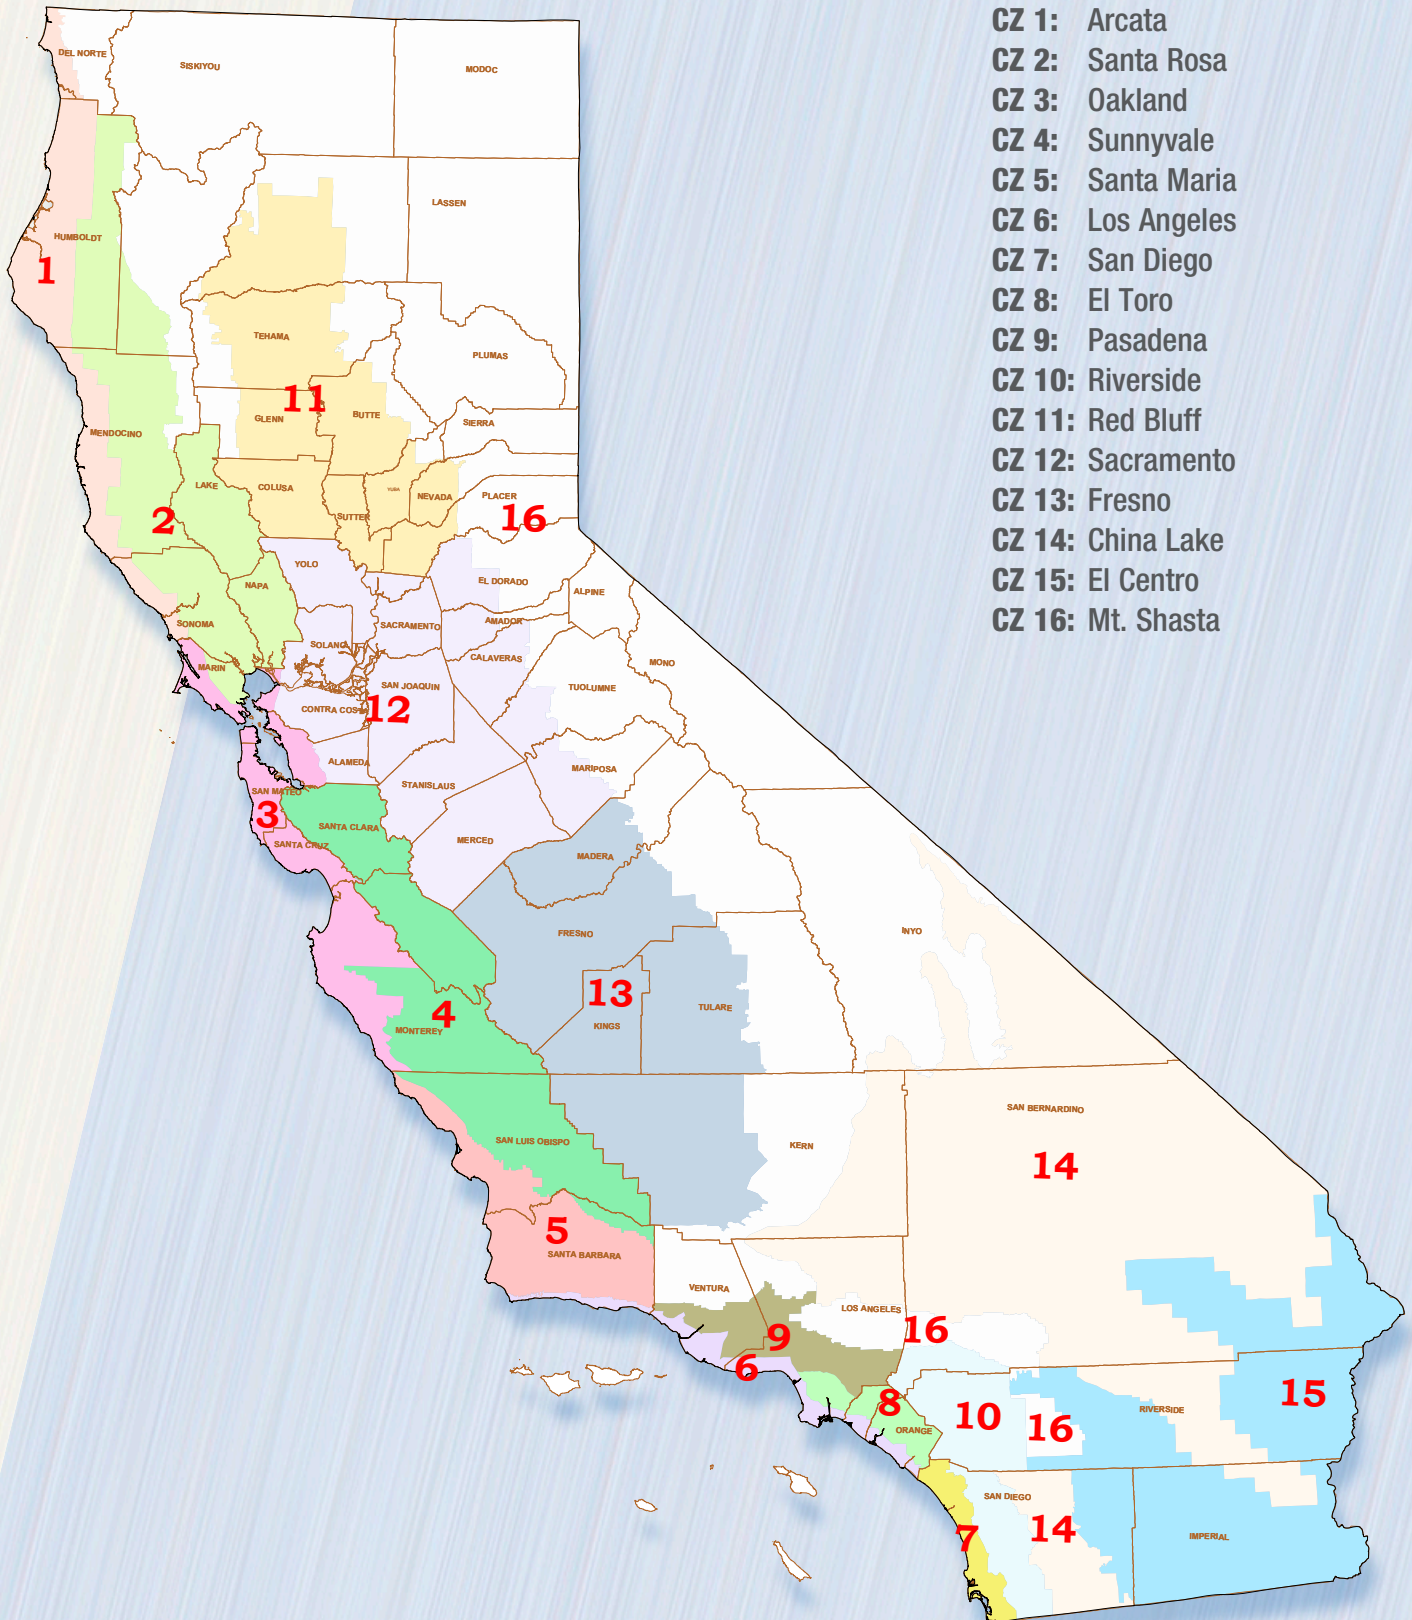

If you live in California, the below criteria must be met as of July 1, 2014. If you do not live in California and choose an Eagle color that is designated with a T24 icon, you are helping protect our environment while improving the energy efficiency of your home or commercial building.

- California Roofers: Can differentiate by knowing the new code

Re-Roof and Alterations

- Re-roof alterations are less than 50% of the existing roof
- Home addition has less than 300 square feet of roofing
- Minimum R38 attic insulation is used
- Minimum R4 above deck insulation is used
- There is no duct work in attic or duct insulation meets new requirements
- High profile tile is used (rise to width ratio of 1:5 when installed)
- Elevated battens are used
- Radiant barrier
- Requirements vary by zone, depending on the building and the climate method. [See map on opposite page]

Title 24 Requirements

Index of Title 24 Products

For a quick reference of our Title 24 compliant products, refer to the product index table below. Also look for our **T24** indicator on the product pages.
