Providing Trustworthy Solutions for the Building Industry

Since 1989, Eagle Roofing Products has been the trusted leader in the building and roofing industries, offering the largest selection of stunning and sustainable concrete roof tiles in an array of profiles, textures and colors. ***However, we are more than just roof tile.*** We understand that for a functional roof to last decades, it goes beyond just the type of roofing material used. It's about the quality of the components that make up that roof, from the battens to the flashing, ventilation, weather blocking and more.

That's why we have partnered with some of the most established manufacturers in the roofing business to provide our customers with the right roof components to build a strong, reliable roof system that will properly protect their residential or commercial project. ***A dynamic and complete tile roof system that is second to none and one that you can trust.***

Eagle Partners:

Most products contained in this brochure are from third party vendors. **EAGLE ROOFING PRODUCTS DOES NOT WARRANT THESE PRODUCTS.** Please check manufacturer's website for warranty and product information.

Underlayments/Flexible Flashing

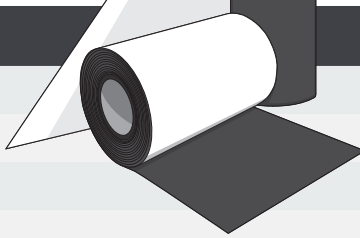

SECURE ROLL™ FLEXIBLE FLASHING

**SECURE TILE ROOF™
COMPONENTS**
by Eagle Roofing Products

A flexible flashing material that can be used to make transition areas of a roof watertight. Available in two sizes, Secure Roll has applications for details such as sidewalls, headwalls, chimneys, skylights, pitch changes and roof penetrations.

- USA Made 
- Profile Specific
- Fully Adhered
- Non-Toxic Lead Alternative
- Ideal for Headwalls, Side Walls, Chimneys, Solar and Skylights

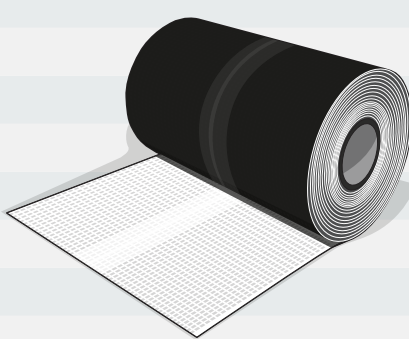

Packaged 2 Per Box				Stock Number
Black Flexible Flashing	11" x 33'	2 per Box		8106
Black Flexible Flashing	11" x 33'	BULK 21 box minimum		8106
Black Flexible Flashing	20" x 16-½'	2 per Box		8108
Black Flexible Flashing	20" x 16-½'	BULK 21 box minimum		8108

Flex Flash

A flexible flashing material that can be used to make transition areas of a roof watertight. Flex Flash has applications for details such as sidewalls, headwalls, chimneys, skylights, pitch changes and roof penetrations.

- USA Made 
- Profile Specific
- Easily Conforms To All Profiles
- Easy To Install

Headwall Flashing - 15 ft. Per Roll					Stock Number

Flex Seal - Capistrano	15-3/4"	Terracotta	Aluminum	8125
Flex Seal - Capistrano	15-3/4"	Black	Aluminum	8126

Flex Vent

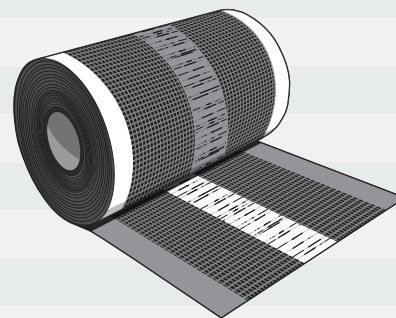

***Core Ventilated Roof System Component**

A combination weatherblocking/ridge vent. It meets the code requirements to weather block the ridges. It also has vent openings that allow it to be installed for the purposes of attic venting or as part of the Ventilated Roof System. Once installed, it is hidden under the trim tiles.

- Butyl Adhesive Attachment
- All Aluminum Construction
- Easily Conforms To All Tile Profiles
- Enables Attic Venting Through Ridge

Ridge Vent - 25ft. Per Roll				Stock Number
Flex Vent - Flat	9"	Terracotta	Aluminum	8109

Underlayment/Arched Battens

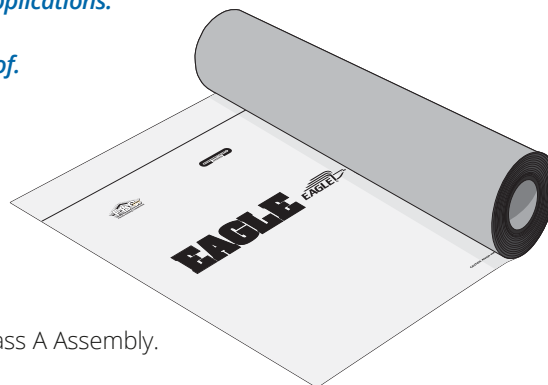

Underlayment

Eagle Armor by APOC is a premium, all-purpose fleece top underlayment and leak barrier that pairs beautifully with residential and commercial concrete roof tile applications. Superior protection against wind driven rain, ice dams, leaks and water damage, Eagle Armor by APOC is a high-caliber product that will prolong the life of your roof.

- USA Made 
- Easy To Install
- Helps Prevents Leaks
- Prolongs Life of Roof

APPROVALS:

- Exceeds performance requirements of ASTM D1970, TAS 103 & ICC AC 48.
- Miami-Dade County Product Control Approved.
- ASTM E108 and UL 790 when tested under Eagle Roofing Tiles it becomes a Class A Assembly.
- UL Classified File #R39178.

Sold Individually			Stock Number
Eagle Armor	60mils	2 Sq/Roll	8157

ARCHED BATTENS™

ENERGY SAVING. INNOVATIVE DESIGN. SYSTEM DRIVEN.

Made specifically by Eagle, Arched Battens are raised battens that provide attachment for roof tiles with anchor lugs, and promotes airflow under a tile roof. Raising the tiles creates more airspace and aids in insulating the roof in hot climates, prevents ice damming in colder regions and dries out the tile in humid areas.

- USA Made 
- Created From Graded Lumber
- Prevents Water Damming
- Provides Thermal Barrier and Ventilation

**SECURE TILE ROOF™

Ventilation

O'Hagin Tile Roof Vents

***Core Ventilated Roof System Component**

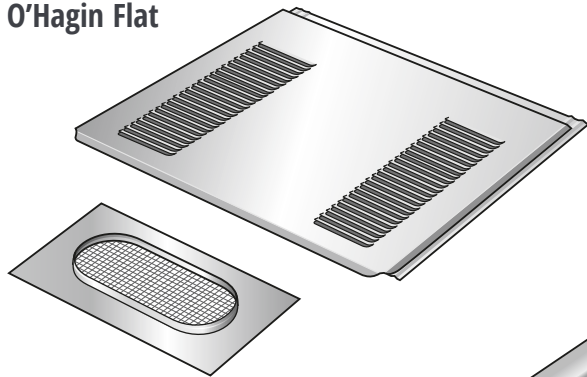

O'Hagin Vents are off-ridge vents that can be installed for the purposes of attic venting or as part of the Ventilated Roof System. O'Hagin Vents are designed as a two-piece system consisting of a primary vent (subflashing) and a profile-specific secondary vent (cover) which blends into the surrounding field tile.

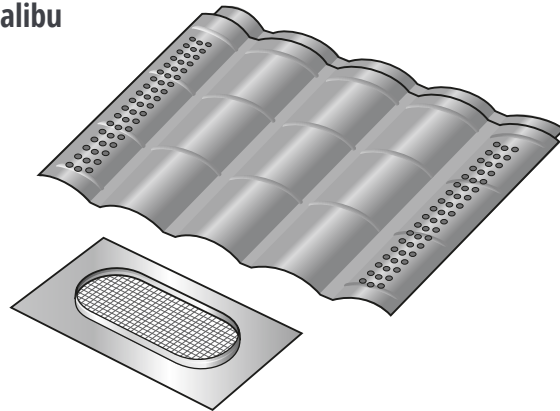

- USA Made 
- Profile Specific
- May Be Utilized For Air Intake and Exhaust
- Provide Superior Airflow
- Easy To Install

Sold Individually					Number
O'Hagin Roof Vent - Malibu	26" x 19", 4" Flange	9 lbs	Galvanized		8210

Weather Blocking

Verde Weatherblock

Verde Weatherblock is a rigid, UV-stable plastic weatherblocking product that is profile specific. Attached to the trim nailer board prior to the attachment of the trim, it is available in straight ridge pieces and angled hip pieces. (For flat tile, a universal piece is used.)

- USA Made 
- Available For All Profiles
- Alternative To Mortar
- Ideal For All Climates
- U.V. Resistant

Sold in Footage				Stock Number
Universal Flat - Hip/Ridge	200' per box	Plastic		8218
Malibu - Ridge	300' per box	Plastic		8219
Malibu - Left Hip, Right Hip	300' per box	Plastic		8220
Capistrano - Ridge	300' per box	Plastic		8221
Capistrano - Left Hip, Right Hip	300' per box	Plastic		8222

RAKE SEAL™

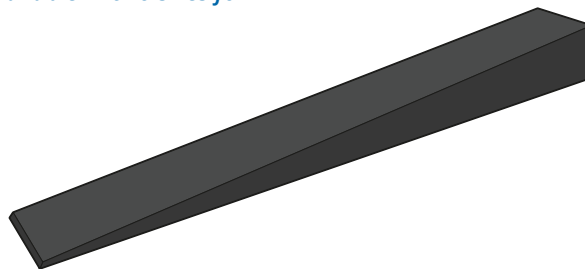

ARCHITECTURALLY DRIVEN
RAKE DETAIL ENHANCEMENT

**SECURE TILE ROOF™
COMPONENTS**
by Eagle Roofing Products

Rake Seal is a weatherblocking material that takes the place of rake tile or mortar on rake edges. Rake Seal is designed for flat tile roofs, and is available in two sizes for roofs with and without battens.

- USA Made 
- Gable End Finish
- Nailable/Adhesive
- U.V. Resistant
- Alternative to Rake Trim

1 INTAKE

The Ventilated Roof System: Function and Beauty At Its Finest

There is no doubt that an Eagle concrete tile roof is beautiful and incredibly durable. However, did you know that you can increase the longevity of the roof itself, and further enhance the inherent energy efficiency properties and R-value, by upgrading to a Ventilated Roof System?

A Ventilated Roof System is comprised of three key elements and components:

1. Intake: Air enters the roof system through a **perforated metal eave closure**.

A standard eave closure offers a small drainage opening and does not encourage air intake.

2. Airflow: The velocity of the airflow under the roof tiles is elevated by using **Eagle's Arched Battens**. The arches serve a dual purpose of promoting energy saving airflow, while facilitating drainage preventing water damage to the underlayment and roof deck.

3. Exhaust: Proper air exhaust occurs in the upper third of the tile roof system. Exhaust can be accomplished with ridge ventilation, or with profile specific **O'Hagin Roof Vents**.

Install a concrete tile roof you can be proud of! The Ventilated Roof System aids in extending the lifespan of the underlayment, and components, as well as helps your customers save on energy costs by reducing the heat transfer through the attic into the living space.

For more information on the Ventilated Roof System and accompanying components, please contact your local Eagle Account Representative at www.eagleroofing.com

Eagle Design Centers & Manufacturing Facilities Servicing the United States and Canada

Whether you are an Architect, Builder, Designer, Distributor, Roofer or Homeowner, with four manufacturing plants servicing the United States and Canada, our customers can rest assured that we can provide the highest quality roofing materials and components to meet their needs. Durable, sustainable products and lasting customer relationships are the core of our business. That's what inspires us to be your company of choice. **That's what makes us different.**
