Concrete Roof Tile

The Northwest Collection

EAGLE ROOFING PRODUCTS

USA Owned. USA Made.

SIMPLE. *elegant*. SOLUTIONS.

from a company you can trust

a roof can represent up to

40%

of a home's curb appeal!

Eagle Concrete Roof Tiles
Gorgeous Curb Appeal. Infinite Choices.

- Choose from an extensive collection of profiles and textures
- Vast color offering in attractive ranges and multi-color blends
- Flat tiles offer allure and charm to Colonial, Contemporary, Craftsman, French Provincial, Modern, Ranch and Tudor designs
- High profile Barrel tiles are beautiful and timeless, ideal for Spanish and Mediterranean architecture, as well as large commercial structures
- Medium profile tiles are very adaptable and complement both Modern and Traditional designs, in addition to commercial buildings
- Concrete roof tile is the ideal alternative to slate, wood, stone coated metal, and asphalt roofing materials
- Tile roofs enhance curb appeal and increases the value of homes and businesses over time

Eagle is Peace of Mind

- Founded in 1989, we are USA Owned. USA Made.
- Transferable Limited Lifetime Product and Limited 10 Year Replacement Cost Warranty
- Our products are affordable, sustainable and *energy responsible*
- Our tiles are tested to the highest standards* for fire, high-wind, hail and freeze-thaw protection
- With proper maintenance and high-quality roof components, an Eagle concrete tile roof can last the life of the building it is on
- Our customer service, sales and technical teams are here for you before, during and after the sale

2022-2023
color of the year

Brown Gray Range

PANTONE
7530 C

PANTONE
WARM GRAY 11 C

Timeless. Versatile. Balanced.

A gorgeous color that is anything but boring, Brown Gray Range exemplifies organic living at its best. A sophisticated classic inspired by nature, this effortless neutral is interesting and inviting, beautifully complementing a multitude of color palettes, exterior finishes and landscaping associated with any residential or commercial architecture.

Available in 5 profiles:

Bel Air · Golden Eagle · Ponderosa Capistrano · Malibu

Get inspired and explore the possibilities!

Brown Gray Range is:

- a timeless, earthy shade that will never feel dated, and is easily adaptable for every design style.
- perfectly balanced, grounded in both warm and cool tones, and pairs beautifully with such natural exterior elements as brick and stone accents, mixed metals, and wood finishes.
- harmonious and welcoming, correlating into a stunning roofscape that will undoubtedly elevate your curb appeal.

Flat Profiles

Limitless options without compromise, Eagle's Flat Tile profiles offer graceful beauty, rugged strength and enhanced curb appeal. Available in a vast array of colors from warm earth-inspired tones and cool grays to refreshing natural hues ranging from green to eggplant—its versatile appearance complements both traditional and modern architecture. Depending on the look you are after, our Flat Tiles can emulate the texture and style of natural materials such as wood shake, clay and slate – and are a more affordable alternative.

See for yourself. Concrete roof tile never looked so good.

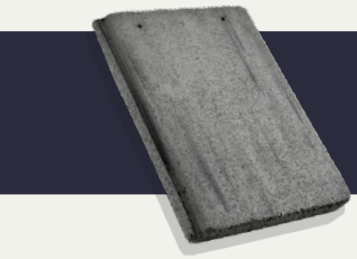

Golden Eagle Staggered
1699 Charcoal Range

Bel Air

Sometimes, the beauty is in the simplicity of the design. As our most popular profile, Bel Air is a flat, smooth tile with tailored lines and a square butt that offers a sleek, elegant finish. Gorgeous on its own or paired with other finishes, Bel Air's versatility allows you to dramatically enhance your curb appeal by mixing materials and going heavier on other exterior elements such as pavers, stonework and landscaping. The choices are endless!

Featured Product

4602 Concord Blend

Blend of Charcoal, Tan

One of our top selling colors, Concord Blend combines two contemporary neutrals to create a rich, classic design that easily shows off the different architectural elements of a home beautifully, without feeling too weighty or heavy.

Concord Blend is the perfect match for on-trend exterior paint colors like warm, creamy whites, as well as stony gray hues or gentle shades of green. It also complements any number of light to mid-range custom finishes including rock, stone, stucco, and plank.

Bel Air Copper

Introducing our new Copper Series featured in our beautiful Bel Air profile. Inspired by the vintage look of semi-weathered slate, this collection of roof tiles mimic some of the old-world, aged roofscapes seen throughout Europe.

Our Bel Air Copper comes in a splendid selection of earthy colors with distinctive but subtle, rust-colored streaks, to give it a splash of red-orange luster, without being overpowering. The clean defined lines and warm finish of this roof tile will add elegance, beauty, and a uniqueness to many different styles of residential, commercial, and historical properties.

SRB 4666 Grass Valley Range Copper - *Range of Dark Greens, Rust Streaks*

Staggered Installation

Installing flat tile with a staggered exposure is an easy way to give a home an "Old World" look. While staggered exposure tiles are a natural fit for architectural styles like English Cottage and French Country, this unique look can breathe new life into homes of many varied styles.

It is vitally important that the professional roofing contractor plans the entire roof layout prior to installing tiles, taking into consideration the weight and waste. Approximately half of the tiles on a staggered roof will have a shorter exposure than the other half. It will be essential to calculate the additional tiles required to create a unique staggered exposure roof prior to ordering product. Whether installing a staggered exposure tile roof with battens or without, it is imperative to make proper measurements when preparing the roof for installation. The first course at the eave will be installed normally with a standard exposure. The staggered exposure begins at the second course.

If battens are utilized, the staggered exposure is achieved by installing partial battens (no greater than 12" in length) immediately above the primary course battens beginning on the second course (as seen in upper inset illustration). The tiles with the shorter exposure will hang on the higher partial batten (see image). If a direct-to-deck application is utilized (no battens), a second set of chalk lines will be marked at each course, one line for the normal exposure and one for the staggered exposure tiles. This is based on a 1" stagger.

One more consideration is the water channel at the left side of the tile. The bottom of the water channel will be visible. Leaving this portion of the water channel exposed can detract from the desired look of the staggered roof, especially on steeper roof pitches where a majority of the face of each tile will be visible. If desired, exposed channel can be removed using a saw and/or tile nippers (as seen in lower inset illustration).

In the end, you can rest assured that flat tile with a staggered exposure will create an overall beautiful, unique look to your project.

Please note that although aesthetically stunning, staggered installations are extremely complicated and may cause layout and waterproofing complications. Your Roofing Contractor is ultimately responsible for the planning and proper installation of the tile.

Estate

If you like the simplicity of the Bel Air profile but are looking to add a little more dimension to your roof, then the Estate profile is the ideal choice. Fine coarse lines and a more defined edge provides texture and nuanced beauty to your outdoor space, perfectly complementing any architectural style—both residential and commercial.

Featured Product

SHE 8715 Roanoke Blend

Blend of Light Gray, Dark Gray, Gold, Taupe

Extremely versatile, Roanoke Blend combines two popular neutrals, gray and taupe, and is beautifully accented by a warm gold pop of color. This palette can serve as the foundation for a dazzling monochromatic exterior color scheme paired with lighter toned custom finishes or one filled with bold, rich colors that will add a sense of contrast.

In the Estate profile, Roanoke Blend is a spectacular roofscape that provides depth and personality, making it a great choice for most architectural design projects.

Golden Eagle

Emulating an upgraded wood shake look, the Golden Eagle profile combines a smooth, flat surface with a partial broom swept texture that immediately grabs your attention. This beautiful, uniformed appearance allows you to create an intriguing design that welcomes many different residential styles from French Provincial to Cozy Cottage to Beach and Coastal. This profile is available in rich, neutral shades which will definitely make a home more inviting!

Featured Product

1634 Kings Canyon Blend

Blend of Dark Green, Tan, Red and Black Streaks

True to its California National Park namesake, Kings Canyon Blend highlights the hues found in its Giant Sequoia and Redwood forests, lush grass, and earth laden meadows. It also encompasses the majestic gray and black streaked granite faces and peaks of the Sierra Nevada Mountains.

Kings Canyon Blend's complex forested hues harmonize nicely with natural woodwork or siding, grey-taupe stone or red brick, and subtle shades of olive and brown exterior paints.

Ponderosa

A more durable and affordable alternative to wood shake, our Ponderosa concrete roof tile has beautifully textured shadow lines that graze its surface to deliver a truly rustic and natural wood appearance. If you are seeking remarkable curb appeal, a Ponderosa tile roof will complement many architectural styles including Prairie, Craftsman and Bungalow, to name a few.

Featured Product

SCP 8801 New Orleans Blend

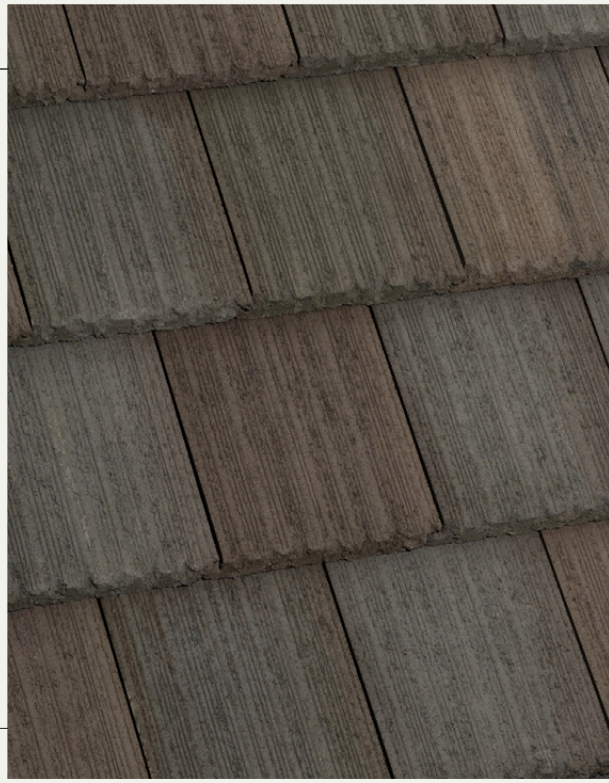

Blend of Green, Brown, Gray

Dark and earthy, New Orleans Blend will wrap your home in natural warmth. The dramatic tones add sophisticated beauty to your roofscape while serving as a stunning, organic backdrop for creative accents and architectural features. Let nature be your inspiration by pairing it with rich clays, lush greens, or oaky browns. Or perhaps a buttery yellow or creamy white, which will instantly add contrast and freshness to your design.

A gorgeous blend of green, brown and gray, this muted color palette is timeless, elegant and offers serious curb appeal. Make your mark in the neighborhood with an Eagle concrete tile roof in New Orleans Blend.

Tapered Slate

Our Tapered Slate concrete roof tile features a beautiful smooth texture, beveled sides and an aggressive chamfered edge treatment that highlights the inherent beauty of traditional slate. Colors range from a variety of timeless earth tones to mottled shades of purple and green, producing a brilliant roof that exudes curb appeal. This elegant and enduring roofing material will complement almost any type of residential architecture, as well as historic buildings, churches, universities, municipalities and more.

Featured Product

49595 Dark Charcoal

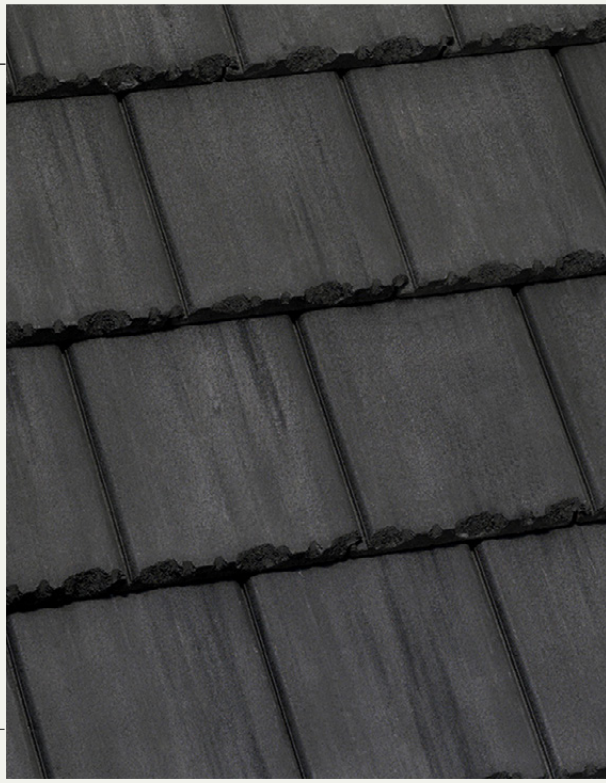

Hues of Dark Charcoal, Black Streaks

A sophisticated alternative to black, Dark Charcoal is a universal shade that fits modern styles as well as traditional and contemporary architecture. It is also a great foundational color that allows you to create endless exterior color palettes. Consider a cool scheme featuring blues and greens or integrate warmer hues like red. For a beautiful contrast, white provides a clean, crisp look.

Dark Charcoal in our Tapered Slate profile provides a classy and unique appearance that will beautifully transform your most important investment.

Tapered Slate Copper

Part of our new Copper Series, Tapered Slate Copper takes the appearance of European aged slate to the next level with its subtle, rust-colored streaks serving as an additional accent to the roof tile's overall innate beauty.

Offered in muted to vibrant multi-colored blends infused with copper-inspired tones, Textured Slate Copper is the epitome of understated glamour, exquisitely enhancing the architectural style of your home or high-value property.

High & Medium Profiles

Inspiration that will move you... Eagle's high and medium barrel shaped profiles exude rich colors, unmatched aesthetics and timeless elegance. Whether you are looking to emulate the authentic look of Spanish tile in the Old World or wish for a more contemporary style while mirroring the Mediterranean appearance found in the roofscapes of Italy, France and Greece; you can rest assured that your curb appeal will be the envy of everyone in your neighborhood.

Capistrano

A high S-profile, our Capistrano is semi-cylindrical and is the most traditionally recognized of all tile profiles. A style icon, this centuries-old design perfectly complements Spanish and Italian architecture and pairs beautifully with stucco, stone and brick siding. However, its stunning good looks extend far beyond these influences and can be found in about every style of building from residential and commercial to military and institutional structures throughout the United States and Canada.

Featured Product

SCC 8830 Albuquerque Blend

Blend of Dark Brown, Terracotta, Maroon

Exuding natural warmth, Albuquerque Blend features a deep, rich terracotta along with dark brown touches that brings an air of modernness, while the hints of maroon add depth to the overall roofscape. This earthy finish works well with a wide variety of different schemes.

For a Mediterranean feel, pair our roof tile with a crisp white or light beige base for a beautiful contrast, or a taupe with green undertones for a winning combination. Desiring a balanced and harmonious effect? This spicy color really pops against softer shades like a denim blue or a pale sage exterior.

3636 Piedmont Blend

Malibu

Malibu concrete roof tiles are medium-height tiles with a double-S shape aesthetic. Its gentle curves create a gorgeous roofline that easily complements modern architectural designs and large buildings. It's particularly effective on distinctive homes, apartments, hotels, places of worship and commercial structures. It's the best of both worlds, where Mediterranean meets Contemporary.

Featured Product

2645 Sunrise Blend

Blend of Terracotta and Brown

Exuding a bit of an Old World flair, Sunrise Blend is a gorgeous blend of terracotta and brown that beautifully complements Mediterranean and Spanish influenced architectural styles. The colors found in the roof tile plays well with both cool and warm tones giving you endless options. Consider light neutrals, such as white, taupe and beige for your exterior. For a more contemporary and elegant look, a soft gray would provide a luminous effect. Another beautiful color combination? Adding a muted shade of yellow for a warm, inviting space.

Boosted Capistrano

Accessory Tile

It's easy to create the beauty of an authentic mortar-boosted clay roof with our Boosted Capistrano accessory pieces. Available in a wide range of colors, these pieces were designed to complement your Capistrano tile. For best results, mix your Boosted color and base color as this will add to the authenticity of your roof.

Considerations:

- Choose a Boosted accessory piece to go with your base tile. For color options, please contact an Eagle Account Representative.
- Decide on the look that you want. Prefer a neater treatment? Want a more authentic look?
- Decide how much boost you would like.

No matter what type of Boosted application you choose, your new Eagle Boosted Capistrano roof will be sure to impress.

% USED ON ROOF	APPROX. INSTALLED WEIGHT FIELD TILE PER 100 SQ FT
10% Application	990
20% Application	1080
30% Application	1170

Each Boosted piece weighs approximately 4.8 lbs.

approx. 20% Overall Boost | approx. 1080 lbs per square

approx. 10% Overall Boost | approx. 990 lbs per square

approx. 30% Overall Boost | approx. 1170 lbs per square

Why Eagle Roofing Products and Concrete Roof Tile

Eagle Roofing Products is the largest, USA owned concrete roof tile manufacturer in the United States. Whether you are building a new home or re-roofing your existing one, your home deserves the best roof possible. When you choose Eagle concrete tile, you'll get a roof that is aesthetically stunning, durable and sustainable.

Founded over three decades ago by Robert Burlingame, Eagle began operations in the fall of 1989 with one high-pressure concrete tile extrusion machine. Today, Eagle's Rialto, California facility is the largest in North America. In addition to Rialto, we operate facilities in Phoenix, Arizona as well as Stockton, California and Sumterville, Florida meeting the demand for concrete roof tile across the United States and Canada.

Our expertise, coupled with our extensive array of profiles and colors, enables us to provide our customers with high quality concrete roofing products that are beautiful, long-lasting and environmentally friendly.

Eagle's long experience in the roof tile industry and dedication to prompt personal response to its customers' needs have resulted in a well-deserved reputation for quality and service—a reputation that is unmatched.

Eagle is customer service.

Golden Eagle Staggered
1699 Charcoal Range

Unsurpassed Beauty, Strength and Longevity

When you choose a concrete tile roof from Eagle Roofing Products, you are choosing years of protection and peace of mind. Our tile is tested to the highest standards of the industry. A properly installed Eagle Tile Roof will withstand the elements through rain, snow, high wind and scorching heat—outperforming all other roofing products, while remaining aesthetically stunning.

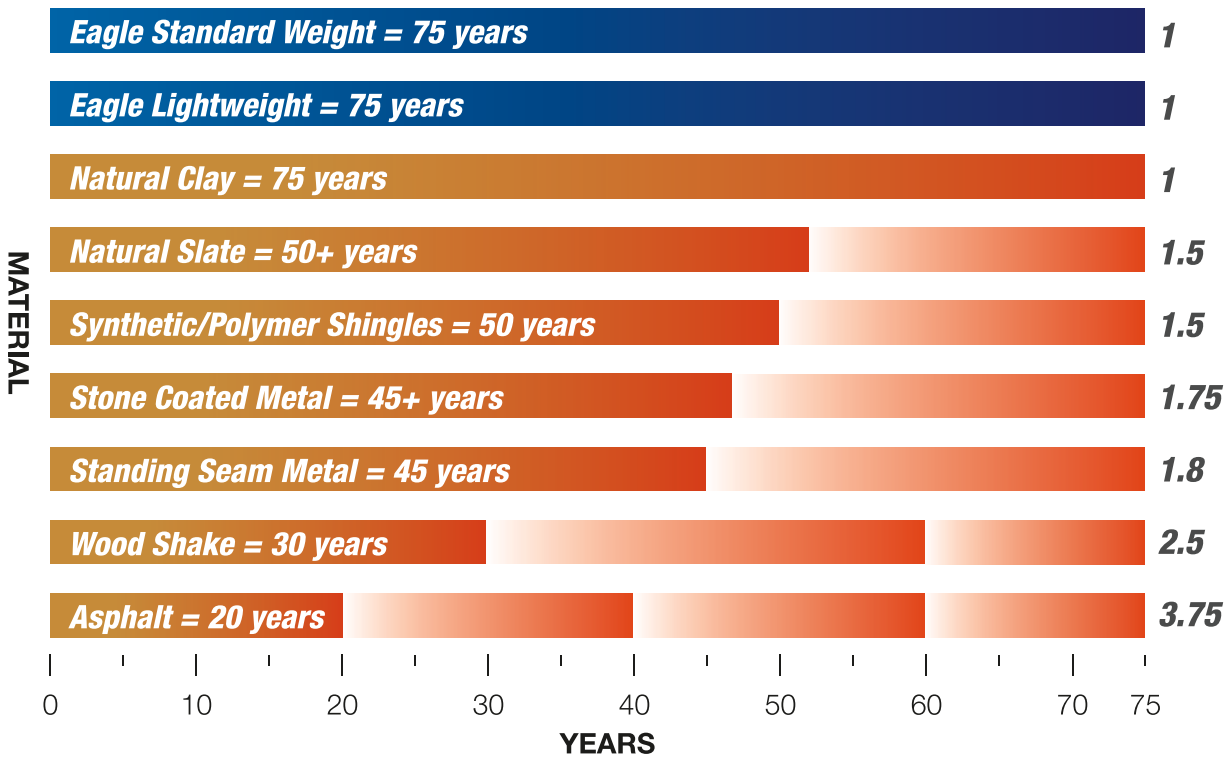

Fire Tested
Eagle Roof Tile is a Class A roof covering that will protect your home and personal property.

High Wind Tested
Installed correctly, Eagle Roof Tile can survive the strongest storms and harshest weather. Eagle tile is tested and approved for use in the Miami Dade high velocity hurricane zone, withstanding sustained winds of up to 180mph.

Hail/Impact Tested*
Concrete roof tile stands up to hail, as well as or better than, any other roofing product. Some insurance companies offer discounted premiums for houses with tile roofs because of its impact resistance.
**Stockton, Arizona and Florida manufactured tiles only.*

***Freeze Thaw Protection**
Eagle Roof Tile passes Freeze-Thaw requirements. **Excludes color bonded/slurry tiles.*

*Roofing material lifespan over 75 years.**

Number of times a reroof is required within 75 years*.

**From the NAHB Study of Roofing Materials Life Expectancy.*

Tile Roofing Is Simply The Superior Choice

NEW CONSTRUCTION · REROOF · RESIDENTIAL · COMMERCIAL

HOW DO REAL TILE ROOFS COMPARE TO ASPHALT SHINGLES?

Tile. Sustainable, superior protection.

- Real tile roofs are no longer only "round and red". Tile roofs are available in a variety of profiles and colors.
- Concrete tile roofs are produced from ALL natural products sand, cement, water and oxide.
  - Tile roofs are recyclable and biodegradable at the end of their lifespan.
  - Tile roofs are not plastic, resin, rubber or metal.
  - Tile roofs do not warp, rust or bend.
- Tile roofs are heavier than asphalt shingles. Weight equates to longevity, thermal superiority, weather, impact resistance and much more.
- Tile roofs invite extreme weather conditions, while asphalt shingle manufacturers base their sales projections on how many of their roofs will need replacing every year.
  - Tile can withstand sustained winds of up to 180mph*
  - Class A Roof Assembly
  - Hail/Impact Tested (in certain regions)
  - Freeze-Thaw (Excludes color bonded/slurry tiles)

Asphalt Shingle. Temporary, basic roof covering.

- Asphalt shingles are not distinctive.
- Asphalt shingles are not environmentally friendly, as they are a petroleum based product and fill landfills.
- Asphalt shingles do not perform well in hail storms. Roofers swarm neighborhoods subjected to the slightest hail storm.
- Synthetics and plastic products lack a proven track record as a long-lasting and durable roofing product.
- Asphalt shingles are easily damaged by high winds, especially after they age, dry out, lose granules and crack.
- Shingles are not resistant to extreme temperature variations, lending to cracking and loss of color, as they are dependent on granules that are temporarily adhered to the shingle.

High Wind Installation Methods that have been tested to withstand wind speeds of up to 180mph are available. For more information on the durability and longevity of tile roofs, contact your local Eagle Account Representative or visit the Tile Roofing Industry Alliance website (www.tileroofing.org)

Energy Efficiency Ratings

Understanding Reflectivity Values

By virtue of its composition, a concrete tile roof absorbs less of the sun's energy. In addition, the oxide used in our facilities to create our beautiful colors further enhance the tile's surface. Listed with the ***Cool Roof Rating Council***, these roofs can reflect more sunlight and less heat, which can reduce energy usage and costs. Regardless of shape or color, a concrete tile roof is one of the most effective and popular energy-efficient roofing materials available.

The numbers listed under our products highlight the efficiency at the initial testing and again after the 3-year aged testing. Here are the descriptions:

CRRC: The Cool Roof Rating Council has listed this tile after being tested at an independent Laboratory and have given it a unique identification number for easy trackability.

Ref: Ref is short for Reflectance. The fraction of the sun's energy reflected by the roof on a scale of 0-100%. The higher the number, the better reflectivity.

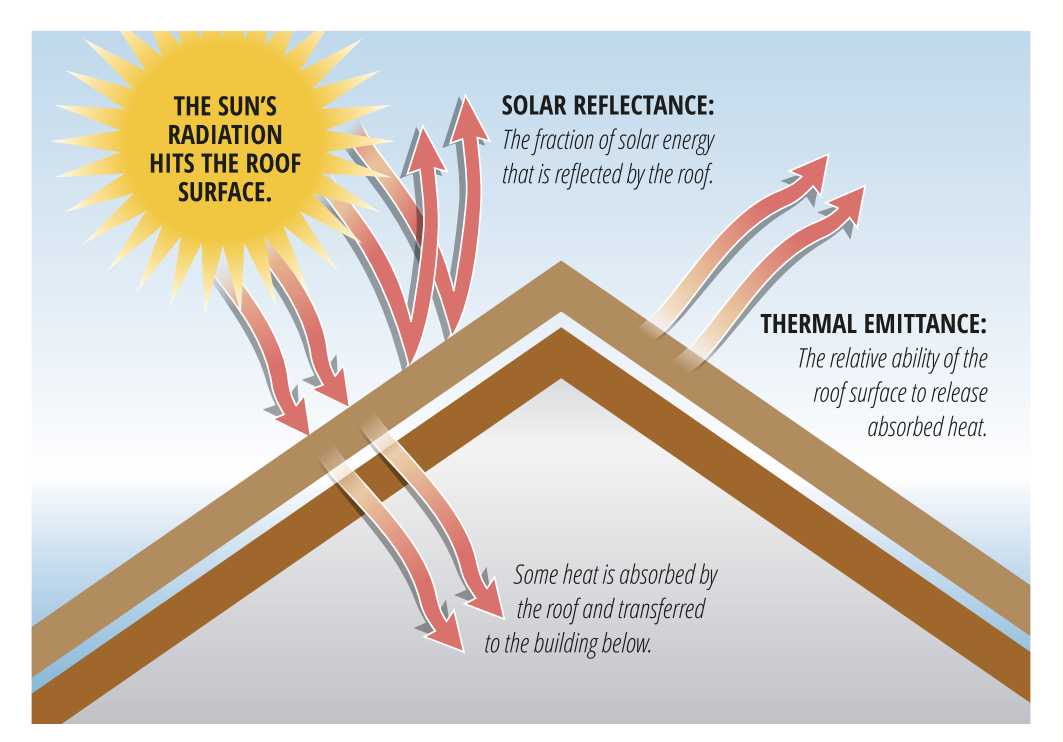

Aged Ref: The fraction of the sun's rays reflected by the roof on a scale of 0-100% after the product has forgone the 3-year testing.

EMI: EMI is short for Emittance. It is the ability of the roof's surface to emit absorbed heat on a scale of 0-100%. The higher the number, the greater the emittance.

Aged EMI: The ability of the roof surface to emit absorbed heat on a scale of 0-100% after the product has forgone the 3-year testing.

SRI: SRI is an abbreviation for Solar Reflectance Index and is the measure that incorporates both the reflectance and emittance into a single value. The higher the number, the greater the tiles' energy efficiency.

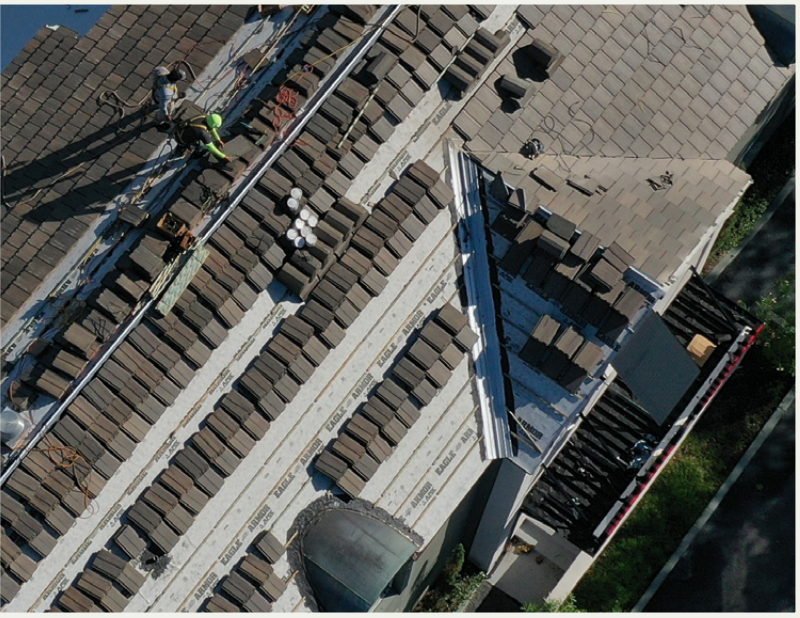

Aged SRI: The measure that incorporates both the aged reflectance and aged emittance numbers into a single value.

Committed to your Trust and Satisfaction

Specifying Eagle

Every effort has been made to provide you with the tools you need to specify Eagle on your next residential or commercial project. You can find these tools on our website at **eagleroofing.com** under the main tab **Specifiers**, as well as under **Technical**.

Approvals

IAPMO ER #1900

Warranty

As the largest USA Owned, USA Made concrete roof tile manufacturer, Eagle Roofing Products proudly stands behind its products with a Transferable Limited Lifetime Product and Limited 10 Year Replacement Cost Warranty. We recommend that all customers read our warranty for details and conditions, which can be found at **eagleroofing.com**. To register your Eagle warranty, visit **erwarranty.com**.

Installation

Eagle recommends that you find a licensed and insured Roofer for all of your roofing needs. Detailed installation recommendations can be found in the ***Concrete and Clay Roof Tile Installation Manual (July 2015)*** published by the Tile Roofing Industry Alliance & Western States Roofing Contractor Association. For further information, visit: **tileroofing.org**

Blended Tile

Blended tile provides added value and beauty to any architectural structure. However, it requires careful placement by your Roofing Contractor, who is responsible for ensuring that the placement of the tile is completed in an aesthetically pleasing manner. Eagle Roofing Products recommends that you discuss this design effect with your Roofer, prior to installation, to ensure that no hot spots (patches of color that undo the blended effect) are created.

Disclaimer

Eagle Roofing Products concrete roof tile is made from natural materials and color variations are to be expected. Every effort has been made to ensure the colors in this brochure are as close to the actual roof tile; however, photographic and printing techniques can alter the printed colors shown, varying it from actual tile colors. In addition, colors are subject to change, as slight variations in color or flashing may occur during manufacturing. **To ensure your satisfaction with the tile you chose from this brochure, we strongly recommend that you obtain a free tile sample** from your Roofing Contractor, an Eagle Design Center or an Eagle Account Representative before placing your order.

Manufacturing Facilities Servicing

Every customer is different. Every project is different. We understand.

Whether you are an Architect, Builder, Designer, Distributor, Roofer or Homeowner, with four manufacturing plants servicing the United States and Canada, our customers can rest assured that we have the right products to meet their needs. Quality products and customer relationships are the core of our business. That's what inspires us to be your company of choice. That's what makes us different.
