2022-2023
color of the year

Brown Gray Range

PANTONE
7530 C

PANTONE
WARM GRAY 11 C

Timeless. Versatile. Balanced.

A gorgeous color that is anything but boring, Brown Gray Range exemplifies organic living at its best. A sophisticated classic inspired by nature, this effortless neutral is interesting and inviting, beautifully complementing a multitude of color palettes, exterior finishes and landscaping associated with any residential or commercial architecture.

Available in 2 profiles:

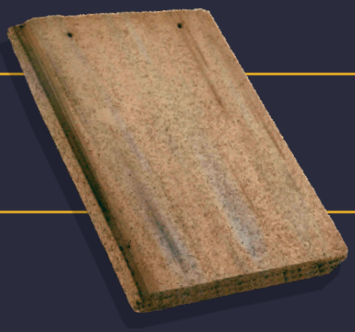

Bel Air · Capistrano

Get inspired and explore the possibilities!

Brown Gray Range is:

- a timeless, earthy shade that will never feel dated, and is easily adaptable for every design style.
- perfectly balanced, grounded in both warm and cool tones, and pairs beautifully with such natural exterior elements as brick and stone accents, mixed metals, and wood finishes.
- harmonious and welcoming, correlating into a stunning roofscape that will undoubtedly elevate your curb appeal.

Flat Profiles

Limitless options without compromise, Eagle's Flat Tile profile offers graceful beauty, rugged strength and enhanced curb appeal. Available in a vast array of colors from warm earth-inspired tones and cool grays to eye-catching hues ranging from red to eggplant—its versatile appearance seamlessly complements both traditional and modern architecture.

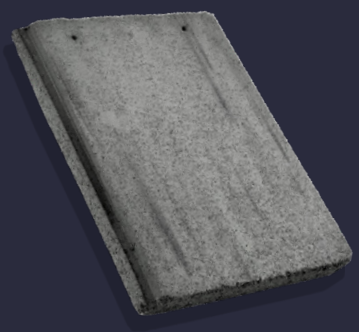

See for yourself. Concrete roof tile never looked so good.

Bel Air—4620 Bloomingdale Blend

Bel Air

Sometimes, the beauty is in the simplicity of the design. As our most popular profile, Bel Air is a flat, smooth tile with tailored lines and a square butt that offers a sleek, elegant finish. Gorgeous on its own or paired with other finishes, Bel Air's versatility allows you to dramatically enhance your curb appeal by mixing materials and going heavier on other exterior elements such as pavers, stonework and landscaping. The choices are endless!

Featured Product

4477 Viera Blend

Blend of Dark Brown, Tan

One of our top selling colors, Viera Blend combines two contemporary neutrals to create a rich, classic design that easily shows off the different architectural elements of a home beautifully, without feeling too weighty or heavy.

Viera Blend is the perfect match for on-trend exterior paint colors like warm, creamy whites, as well as stony gray hues or gentle shades of green. It also complements any number of light to mid-range custom finishes including rock, stone, stucco, and plank.

Bel Air

4743 Cocoa Range

Bel Air, staggered—4602 Concord Blend

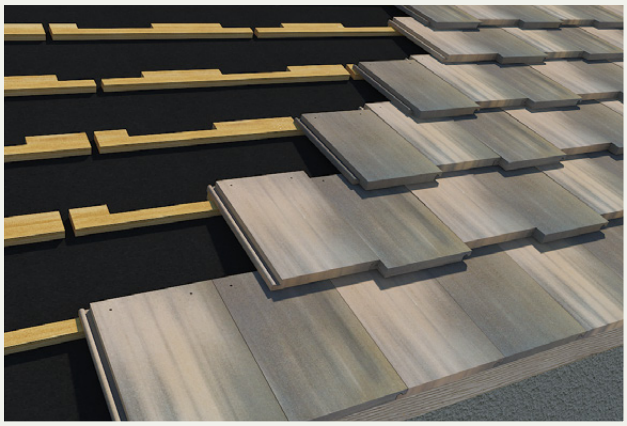

Staggered Installation

Installing flat tile with a staggered exposure is an easy way to give a home an "Old World" look. While staggered exposure tiles are a natural fit for architectural styles like English Cottage and French Country, this unique look can breathe new life into homes of many varied styles.

It is vitally important that the professional roofing contractor plans the entire roof layout prior to installing tiles, taking into consideration the weight and waste. Approximately half of the tiles on a staggered roof will have a shorter exposure than the other half. It will be essential to calculate the additional tiles required to create a unique staggered exposure roof prior to ordering product. Whether installing a staggered exposure tile roof with battens or without, it is imperative to make proper measurements when preparing the roof for installation. The first course at the eave will be installed normally with a standard exposure. The staggered exposure begins at the second course.

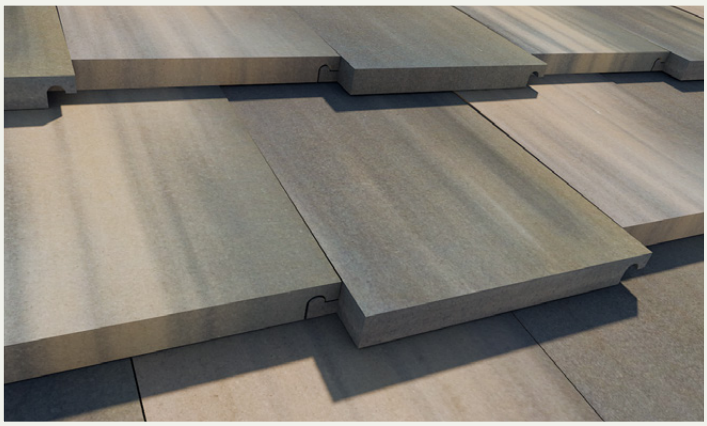

If battens are utilized, the staggered exposure is achieved by installing partial battens (no greater than 12" in length) immediately above the primary course battens beginning on the second course (as seen in upper inset illustration). The tiles with the shorter exposure will hang on the higher partial batten (see image). If a direct-to-deck application is utilized (no battens), a second set of chalk lines will be marked at each course, one line for the normal exposure and one for the staggered exposure tiles. This is based on a 1" stagger.

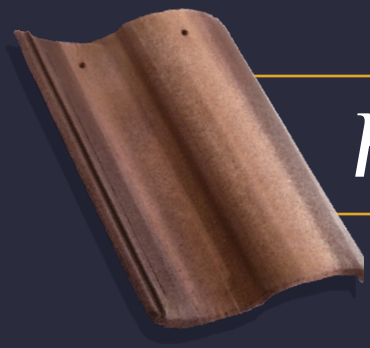

One more consideration is the water channel at the left side of the tile. The bottom of the water channel will be visible. Leaving this portion of the water channel exposed can detract from the desired look of the staggered roof, especially on steeper roof pitches where a majority of the face of each tile will be visible. If desired, exposed channel can be removed using a saw and/or tile nippers (as seen in lower inset illustration).

In the end, you can rest assured that flat tile with a staggered exposure will create an overall beautiful, unique look to your project.

Please note that although aesthetically stunning, staggered installations are extremely complicated and may cause layout and waterproofing complications. Your Roofing Contractor is ultimately responsible for the planning and proper installation of the tile.

High & Medium Profiles

Inspiration that will move you... Eagle's high and medium barrel shaped profiles exude rich colors, unmatched aesthetics and timeless elegance. Whether you are looking to emulate the authentic look of Spanish tile in the Old World or wish for a more contemporary style while mirroring the Mediterranean appearance found in the roofscapes of Italy, France and Greece; you can rest assured that your curb appeal will be the envy of everyone in your neighborhood.

Capistrano

A high S-profile, our Capistrano is semi-cylindrical and is the most traditionally recognized of all tile profiles. A style icon, this centuries-old design perfectly complements Spanish and Italian architecture and pairs beautifully with stucco, stone and brick siding. However, its stunning good looks extend far beyond these influences and can be found in about every style of building from residential and commercial to military and institutional structures throughout the United States and Canada.

Featured Product

39604 Maple Creek Blend

Blend of Light Brown, Taupe, Gray, Tan

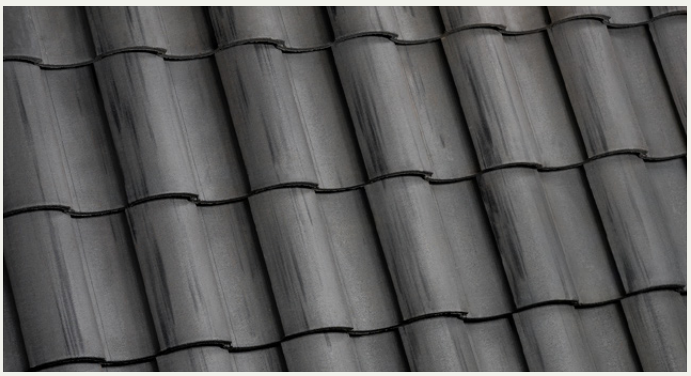

Oh so pretty! That is how we describe Maple Creek Blend with its beautiful blend of earthy tones that will effortlessly enhance your dream remodel or new construction home. Sophisticated and welcoming, this colorway is amazingly versatile and pairs well with a cool palette as well as a warm.

Create a stylish and inviting ambiance by glossing your exterior with a shade that falls in the white, cream, gray or brown family. A neutral backdrop will allow you to add bold accents and accessories all while complementing your home's focal element, your Maple Creek Blend roofscape.

Malibu

Malibu concrete roof tiles are medium-height tiles with a double-S shape aesthetic. Its gentle curves create a gorgeous roofline that easily complements modern architectural designs and large buildings. It's particularly effective on distinctive homes, apartments, hotels, places of worship and commercial structures. It's the best of both worlds, where Mediterranean meets Contemporary.

Featured Product

29501 Maple Forge

Hues of Red Orange, Maroon Streaks

Warm, joyful and vibrant are just a few adjectives that define Maple Forge. If you want to shy away from typical neutral colors, then this red orange wonder is a great alternative. Its rich and deep tone evokes just the right amount of vibrancy without being overwhelming. As the focal point of your home or commercial property, Maple Forge pairs well with toned-down colors like sage green or a grayish-green, or for a more monochromatic scheme you might want to consider brown, tan or a creamy off-white. Whichever route you choose, this cheerful shade will raise your curb appeal to a whole new level.

2424 Rosewood - *Hues of Reddish Orange, Black Streaks*

2503 Sierra Madre - *Range of Charcoal, Black Streaks*

Boosted Capistrano

Accessory Tile

It's easy to create the beauty of an authentic mortar-boosted clay roof with our Boosted Capistrano accessory pieces. Available in a wide range of colors, these pieces were designed to complement your Capistrano tile. For best results, mix your Boosted color and base color as this will add to the authenticity of your roof.

Considerations:

- Choose a Boosted accessory piece to go with your base tile. For color options, please contact an Eagle Account Representative.
- Decide on the look that you want. Prefer a neater treatment? Want a more authentic look?
- Decide how much boost you would like.

No matter what type of Boosted application you choose, your new Eagle Boosted Capistrano roof will be sure to impress.

% USED ON ROOF	APPROX. INSTALLED WEIGHT FIELD TILE PER 100 SQ FT
10% Application	970
20% Application	1055
30% Application	1145

Each Boosted piece weighs approximately 4.8 lbs.

approx. 20% Overall Boost | approx. 1055 lbs per square

approx. 10% Overall Boost | approx. 970 lbs per square

approx. 30% Overall Boost | approx. 1145 lbs per square

Why Eagle Roofing Products *and Concrete Roof Tile*

Eagle Roofing Products is the largest, USA owned concrete roof tile manufacturer in the United States. Whether you are building a new home or re-roofing your existing one, your home deserves the best roof possible. When you choose Eagle concrete tile, you'll get a roof that is aesthetically stunning, durable and sustainable.

Founded over three decades ago by Robert Burlingame, Eagle began operations in the fall of 1989 with one high-pressure concrete tile extrusion machine. Today, Eagle's Rialto, California facility is the largest in North America. In addition to Rialto, we operate facilities in Phoenix, Arizona as well as Stockton, California and Sumterville, Florida meeting the demand for concrete roof tile across the United States and Canada.

Our expertise, coupled with our extensive array of profiles and colors, enables us to provide our customers with high quality concrete roofing products that are beautiful, long-lasting and environmentally friendly.

Eagle's long experience in the roof tile industry and dedication to prompt personal response to its customers' needs have resulted in a well-deserved reputation for quality and service—a reputation that is unmatched.

Eagle is customer service.

Unsurpassed Beauty, Strength and Longevity

When you choose a concrete tile roof from Eagle Roofing Products, you are choosing years of protection and peace of mind. Our tile is tested to the highest standards of the industry. A properly installed Eagle Tile Roof will withstand the elements through rain, snow, high wind and scorching heat—outperforming all other roofing products, while remaining aesthetically stunning.

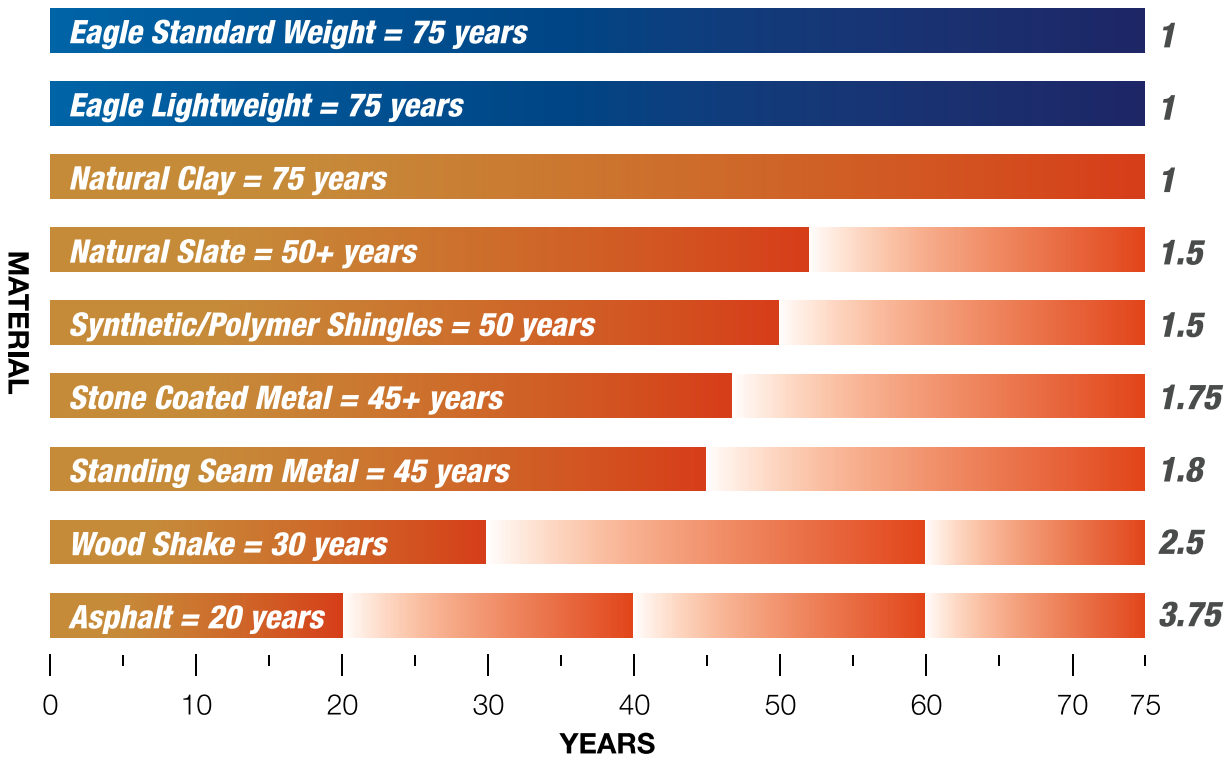

Fire Tested
Eagle Roof Tile is a Class A roof covering that will protect your home and personal property.

High Wind Tested
Installed correctly, Eagle Roof Tile can survive the strongest storms and harshest weather. Eagle tile is tested and approved for use in the Miami Dade high velocity hurricane zone, withstanding sustained winds of up to 180mph.

Hail/Impact Tested*
Concrete roof tile stands up to hail, as well as or better than, any other roofing product. Some insurance companies offer discounted premiums for houses with tile roofs because of its impact resistance.
**Stockton, Arizona and Florida manufactured tiles only.*

***Freeze Thaw Protection**
Eagle Roof Tile passes Freeze-Thaw requirements. **Excludes color bonded/slurry tiles.*

*Roofing material lifespan over 75 years.**

Number of times a reroof is required within 75 years*.

**From the NAHB Study of Roofing Materials Life Expectancy.*

Tile Roofing Is Simply The Superior Choice

NEW CONSTRUCTION · REROOF · RESIDENTIAL · COMMERCIAL

HOW DO REAL TILE ROOFS COMPARE TO ASPHALT SHINGLES?

Tile. Sustainable, superior protection.

- Real tile roofs are no longer only "round and red". Tile roofs are available in a variety of profiles and colors.
- Concrete tile roofs are produced from ALL natural products sand, cement, water and oxide.
  - Tile roofs are recyclable and biodegradable at the end of their lifespan.
  - Tile roofs are not plastic, resin, rubber or metal.
  - Tile roofs do not warp, rust or bend.
- Tile roofs are heavier than asphalt shingles. Weight equates to longevity, thermal superiority, weather, impact resistance and much more.
- Tile roofs invite extreme weather conditions, while asphalt shingle manufacturers base their sales projections on how many of their roofs will need replacing every year.
  - Tile can withstand sustained winds of up to 180mph*
  - Class A Roof Assembly
  - Hail/Impact Tested (in certain regions)
  - Freeze-Thaw (Excludes color bonded/slurry tiles)

Asphalt Shingle. Temporary, basic roof covering.

- Asphalt shingles are not distinctive.
- Asphalt shingles are not environmentally friendly, as they are a petroleum based product and fill landfills.
- Asphalt shingles do not perform well in hail storms. Roofers swarm neighborhoods subjected to the slightest hail storm.
- Synthetics and plastic products lack a proven track record as a long-lasting and durable roofing product.
- Asphalt shingles are easily damaged by high winds, especially after they age, dry out, lose granules and crack.
- Shingles are not resistant to extreme temperature variations, lending to cracking and loss of color, as they are dependent on granules that are temporarily adhered to the shingle.

High Wind Installation Methods that have been tested to withstand wind speeds of up to 180mph are available. For more information on the durability and longevity of tile roofs, contact your local Eagle Account Representative or visit the Tile Roofing Industry Alliance website (www.tileroofing.org)

Specifying Eagle

Every effort has been made to provide you with the tools you need to specify Eagle on your next residential or commercial project. You can find these tools on our website at **eagleroofing.com** under the main tab **Specifiers**, as well as under **Technical**.

Approvals

IAPMO ER #1900

Warranty

As the largest USA Owned, USA Made concrete roof tile manufacturer, Eagle Roofing Products proudly stands behind its products with a Transferable Limited Lifetime Product and Limited 10 Year Replacement Cost Warranty. We recommend that all customers read our warranty for details and conditions, which can be found at **eagleroofing.com**. To register your Eagle warranty, visit **erwarranty.com**.

Installation

Eagle recommends that you find a licensed and insured Roofer for all of your roofing needs. Detailed installation recommendations can be found in the latest ***Florida High Wind Concrete and Clay Tile Installation Manual.*** published by the Florida Roofing and Sheet Metal Contractors Association. For further information, visit: **tileroofing.org**

Blended Tile

Blended tile provides added value and beauty to any architectural structure. However, it requires careful placement by your Roofing Contractor, who is responsible for ensuring that the placement of the tile is completed in an aesthetically pleasing manner. Eagle Roofing Products recommends that you discuss this design effect with your Roofer, prior to installation, to ensure that no hot spots (patches of color that undo the blended effect) are created.

Disclaimer

Eagle Roofing Products concrete roof tile is made from natural materials and color variations are to be expected. Every effort has been made to ensure the colors in this brochure are as close to the actual roof tile; however, photographic and printing techniques can alter the printed colors shown, varying it from actual tile colors. In addition, colors are subject to change, as slight variations in color or flashing may occur during manufacturing. **To ensure your satisfaction with the tile you chose from this brochure, we strongly recommend that you obtain a free tile sample** from your Roofing Contractor, an Eagle Design Center or an Eagle Account Representative before placing your order.
