PRODUCT DESCRIPTION

Capistrano

Profile:	ASTM C 1492, TAS 112, high profile, concrete roof tile
Description:	TAS 112 type 1a, high profile, interlocking class III concrete tile
Dimensions:	17.0" x 12.25" x 3.0"

Malibu

Profile: Description: Dimensions: ASTM C 1492, TAS 112, medium profile, concrete roof tile TAS 112 type 1b, low profile, interlocking class III concrete tile 17.0" x 12.375" x 2.125"

APPLICATION METHOD

Eagle Hybrid	Eagle Hybrid Installation for Capistrano, Malibu, and Bel Air Concrete Roof Tile									
Slope:	Limited to slopes 3:12 or greater in the HVHZ; Outside the HVHZ, shall be in accordance with the recommendations of the FRSA/TRI <i>Florida High Wind Concrete and Clay Roof Tile Installation Manual</i> , Seventh Edition, RAS 199 or RAS 118.									
Roof Deck:	Solid or closely fitted min. 15/32-inch, 32/16 span rated, CDX plywood sheathing for new and existing construction at max. 24-inch span; In the HVHZ, new construction shall be min. 19/32-inch, 40/20 span rated, CDX plywood at max. 24-inch span; Designed by others in accordance with FBC requirements.									
Underlayment:	Installed in accordance with FBC requiren	nents.								
Attachment:	Strong-Tie Quik Drive WSCD Roofing T plywood deck a minimum 1/2-inch. A n BOND™ shall be placed atop any faste shown in the figures below. The "upper" penetrations in the underlayment shall	All tiles shall be secured into the factory located fastener holes by two (2) #8 x min. 3-inch Simpson Strong-Tie Quik Drive WSCD Roofing Tile Screws with sufficient length to penetrate through the plywood deck a minimum 1/2-inch. A minimum 6-inch x1-inch x 1-inch paddy of DuPont TILE BOND [™] shall be placed atop any fasteners within the 3-inch head lap of the "bottom" tiles as shown in the figures below. The "upper" tiles shall be set immediately into the adhesive paddy. All penetrations in the underlayment shall be sealed in accordance with RAS 118 (HVHZ) and FRSA/TRI <i>Florida High Wind Concrete and Clay Roof Tile Installation Manual</i> , Seventh Edition								
IT.

Eagle Hybrid Installation for Capistrano, Malibu, and Bel Air Concrete Roof Tile Fastened to Battens

to battens								
Slope:	Limited to slopes 3:12 or greater in the HVHZ; Outside the HVHZ, shall be in accordance with the recommendations of the FRSA/TRI <i>Florida High Wind Concrete and Clay Roof Tile Installation Manual</i> , Seventh Edition, RAS 119 or RAS 118.							
Roof Deck:	Solid or closely fitted min. 15/32-inch, 32/16 span rated, CDX plywood sheathing for new and existing construction at max. 24-inch span; In the HVHZ, new construction shall be min. 19/32-inch, 40/20 span rated, CDX plywood at max. 24-inch span; Designed by others in accordance with FBC requirements.							
Batten:	Eagle's Scalloped Batten fastened with minimum 0.113" x 2-3/8" ring shank nails placed maximum 18-inch o.c.							
Attachment:	All tiles shall be secured to the batten through the factory located fastener holes by two (2) #8-11 x min. 2.5-inch Simpson Strong-Tie Quik Drive SSWSCB Roofing Tile Screws. A minimum 6-inch x1-inch x 1-inch paddy of DuPont TILE BOND [™] shall be placed within the 3-inch head lap along the upper left side of the "bottom" tiles as shown in the figures below. The "upper" tiles shall be set immediately into the adhesive paddy.							
	G" x 1" x 1" Paddy

Eagle Hybr	Eagle Hybrid Installation for Capistrano Concrete Roof Tile Adhered to Battens							
Slope:	Limited to slopes 3:12 or greater in the HVHZ; Outside the HVHZ, shall be in accordance with the recommendations of the FRSA/TRI <i>Florida High Wind Concrete and Clay Roof Tile Installation Manual</i> , Seventh Edition, RAS 119 or RAS 118.							
Roof Deck:	Solid or closely fitted min. 15/32-inch, 32/16 span rated, CDX plywood sheathing for new and existing construction at max. 24-inch span; In the HVHZ, new construction shall be min. 19/32-inch, 40/20 span rated, CDX plywood at max. 24-inch span; Designed by others in accordance with FBC requirements.							
Batten:	Eagle's Scalloped Batten fastened with minimum 0.113" x 2-3/8" ring shank nails placed maximum 18-inch o.c.							
Attachment:	All tiles shall be adhered to the batten with a single 6-inch x1-inch x 1-inch paddy of DuPont TILE BOND [™] positioned on the batten and under the tile from the upper midpoint to the left hand side of the tile as shown below. A minimum 6-inch x1-inch x 1-inch paddy of DuPont TILE BOND [™] shall be placed atop the tile from the upper midpoint to the left hand side of the tile within the 3-inch head lap of the tiles as shown below. The subsequent course of tiles shall be set immediately into the adhesive paddy.							
	f" x 1" x 1" Pady (above and below tile)

LABELING

1) All tiles shall bear the identifiable marking of the manufacturer's name or logo as follows:

FL17326-R5

LIMITATIONS

- 1) Fire Classification is not within the scope of this evaluation.
- 2) Installation of the evaluated products shall comply with FBC Section 1507.3, FRSA/TRI *Florida High Wind Concrete and Clay Roof Tile Installation Manual*, Seventh Edition Revised and the manufacturer's published application instructions. Installations in the HVHZ shall comply with RAS 118.
- 3) All products listed in this report shall be manufactured under a quality assurance program in compliance with Rule 61G20-3.
- 4) Installation of the evaluated products shall be limited to projects in areas subjected to weathering indices of 50 or greater as illustrated in ASTM C 1492-03(2016), figure 1 (see below).

COMPLIANCE STATEMENT

The products evaluated herein by Zachary R Priest P.E. have demonstrated compliance with the Florida Building Code, 8th Edition (2023) including High-Velocity Hurricane Zones (HVHZ) as evidenced in the referenced documents submitted by the named manufacturer.

Zachary R. Priest, P.E. Florida Registration No. 74021 Organization No. ANE9641

CERTIFICATION OF INDEPENDENCE

CREEK Technical Services, LLC does not have, nor will it acquire, a financial interest in any company manufacturing or distributing products under this evaluation.

CREEK Technical Services, LLC is not owned, operated, or controlled by any company manufacturing or distributing products under this evaluation.

Zachary R. Priest, P.E. does not have, nor will acquire, a financial interest in any company manufacturing or distributing products under this evaluation.

Zachary R. Priest, P.E. does not have, nor will acquire, a financial interest in any other entity involved in the approval process of the product.
