NON-TOXIC

Introducing Secure Roll Plus

Eagle has partnered with our friends at Leadax to bring you **Secure Roll Plus**, setting the standard as the highest quality flexible flashing product on the market. Fully self-adhered and weather resistant, this incredibly robust lead replacement product allows you to seal critical areas of the roofscape for **maximum weatherproofing**.

Features

- Resistant to water, temperature changes, UV exposure, and wind uplift during severe weather
- Easy installation—flexible butyl back with exceptional adhesion makes for quick, easy application
- Butyl backing adheres well on wet surfaces, making it great for repairs
- Premier design that allows cut edge to fold during installation, reducing surface wear and tear
- A film release on the surface for increased protection of product during installation phases
- 33 feet long; saves time & money allowing you to seal more critical areas with less overlap
- Not harmful: non-toxic, lead-free alternative flashing
- 30-year life expectancy per Leadax

Benefits

- Ideal for Concrete and Clay Tile as well as Metal Roofing Systems
- Composed of recycled polyvinyl butyral (PVB), making it recyclable and sustainable
- Superior moldability and can be cut and shaped to any size you need
- Lightweight and better for your back while remaining just as strong as lead
- Ability to apply directly to most construction materials without additional fastening
- 15-year warranty

Seal critical areas of the roof on your next residential or commercial project with the strongest flexible flashing in the industry. Order Secure Roll Plus today from Eagle, the company you've come to trust.

For more information on Eagle's Secure Roll Plus, contact your local Account Representative or visit eagleroofting.com.
